NOTE.—When the Sun is slow, Equation to be added to Apparent Time—
When the Sun is Fast, Equation to be subtracted from Apparent Time.

ECLIPSES OF 1846.

There will be but *two* Eclipses this year; and of course both will be of the Sun.

I. The first will be an Annular Eclipse, on Saturday, the 25th of April, and partly visible here as follows:—

Beginning,	11h 23m. forenoon.	} Mean time.
Apparent ♂,	0 44 afternoon.	
Greatest Obscuration,	0 45 do.	
End,	1 56 do.	
Duration,	2 33	

Digits eclipsed, 6° 49' on Sun's southern limb.

The eclipse will begin at about 128° from the Sun's Vertex, or

ENT,

the nearest

Religious, Literary, Scientific, and Historical
Works; Music; Accordions; Ladies' and Gent's Dressing Cases.

Bank
printed
hand.

ch.

the highest point of his Disc. round on its west or right hand side. The sun will be centrally eclipsed, on the Meridian, in the vicinity of the Bahama Islands, and of the Florida States, at 0h. 17m. aft. II. The second also will be an Annular Eclipse, on Tuesday, the 20th of October, δ at 3h. 3m. 13s., meantime, in the morning; $\odot$'s Lat. at true time of conjunction is $8^{\circ} 22'$ S. ascending, or tending north; and the eclipse will, by reason of both these circumstances, be of course invisible to us.—The Sun will be centrally eclipsed, on the Meridian, in the vicinity of the Isles of Bourbon and the Mauritius, in the Indian Ocean, at 3h. 11m. morn. of our time. It will be a partially visible Eclipse at the Cape of Good Hope.

MORNING AND EVENING STARS OF 1846.

The Planet *Venus* ($\odot$) will be the *Evening Star* till March 2d; then *Morning Star* till December 15th; then again *Evening Star*. *Mars* (δ) will be *Evening Star* till September 10th; then *Morning Star* to the end of the year.—*Jupiter* (ζ) will be *Evening Star* till May 14th; then *Morning Star* till December 3d; then again *Evening Star*.—*Saturn* (♄) will be *Evening Star* till February 10th; then *Morning Star* till August 20th; then *Evening Star* to the end of the year.

LIGHT HOUSES.

Commissioners for Light Houses in the Bay of Fundy.—John Ward, Senior, Robert W. Crookshank, John Ward, Junior, J. Wilson, T. Wyer, Lauchlan Donaldson, W. F. W. Owen, I. Woodward and Charles Hare, Esquires.

Cape Sable Seal Island Light.—The first Light in approaching the Bay of Fundy, is on the South Point of the Seal Island. This is a plain white Light, elevated about 80 feet above high water mark, and may be seen in approaching the Island from any point of the compass. A very dangerous rock, under water, but upon which the sea always breaks, called *Blonde Rock*, lies about 2 miles S. S. W. by compass, from the Light House. Between this rock and the Island, there are some dangers—the ground is rocky throughout, and large vessels, therefore, ought not to attempt passing between them.

Brier Island Light.—In advancing up the Bay, the next Light is situated on Brier Island, about half a mile N. E. from the N. W. point thereof. A plain white light.

Digby Gut Light.—The next light on the coast of Nova Scotia is placed side of the Digby Gut—from Brier Island N. Eastward. The coast is very bold and not indented; the Light is therefore chiefly intended as a guide into Digby Basin. The Lamps and Lanterns were renewed in the Spring of 1835, and reflectors furnished, so that this Light is in high order.—A white Light.

Gannet Rock Light.—This Light bears from the Light on Brier Island, N. W. $\frac{1}{4}$ W. 21 miles. It is intended to warn vessels of their approach to a very dangerous range of shoals and ledges, which extend from the Old Proprietor to the Seal Islands off Machias, a distance of about twenty miles.

Bearings from the Gannet Rock Light House.

To the Old Proprietor, which dries at $\frac{3}{4}$ ebb; (very dangerous), E. by N. $\frac{1}{4}$ N. 7 miles.

" Black Rock, (always above water 25 feet) off White Head, N. E. $\frac{1}{4}$ E.

" South West Head of Grand Manan, N. W. $\frac{1}{4}$ N.

" Northernmost of the Murr Ledges, (dry at two thirds ebb), N. W. by W. $\frac{1}{4}$ W.

" Southernmost of ditto, called Saint Mary's Ledge, (always out of water), S. W. by W. $\frac{1}{4}$ W.

" Machias Seal Island Lights, distant about 13 miles, W. by N. $\frac{1}{4}$ N.

NOTE.—Between the Northernmost and Southernmost of the Murr Ledges, there is a range of dangerous rocks and shoals, many of them always above water, and which extend Westward from the Light House about four miles; from this range, farther Westerly, about eight miles, lies a dangerous breaker called the Roaring Bull. This

may be avoided by keeping three remarkable headlands near the S. W. end of Grand Manan, open.—The red glass having been removed from the Lantern, there is now a flash light—white—twenty seconds dark and forty light in each minute.—The Light House is painted in stripes, vertical, black and white.

Two fixed white lights upon the Machias Seal Islands, were put into operation in 1832—they were elevated about forty-five feet above high water, and bear from each other E. S. E. and W. N. W. distant about 200 feet, by which circumstance of two Light Houses at the same station, they will be immediately distinguished from all other lights upon the coast, (British or American)—the following are the bearings from them, viz:

- " To the Southernmost Murr Ledge, (St. Mary's) E. S. E. easterly.
- " Gannet Rock Light. E. by S. $\frac{1}{4}$ S. 13 miles.
- " Southern Head of Grand Manan, E. by N. $\frac{1}{4}$ N.
- " Northern Head of Grand Manan. N. E. $\frac{1}{4}$ E.
- " N. E. Rock, distant 2 miles, N. E. by N.
- " Little River Head, N. by W.
- " Libby Island Light House, (American,) N. W. by W.

Vessels standing into the Northward, between these Lights and the Gannet Rock, should tack or haul off the moment they bring these Lights in one, as they will not then be more than three fourths of a mile from the Murr Ledges, if more than five miles to the East of the lights.

Head Harbour Light.—Next in order after passing Grand Manan, and the plain white Light, (American) on West Quoddy Point, is Head Harbour Light. This is placed on the North East extremity of Campo Bello, and is a guide to vessels entering the main Channel of West Isles, Moose Island, and the inner Bay of Passamaquoddy; it enables vessels at all times to enter Head Harbour—it is a fixed white light.

Point Le Preau Lights.—Upon this projecting head land two lights are placed, one above the other, and distant 28 feet.—Both lights can be seen from every point of the compass, where they may be useful—both are fixed and white. In consequence of orders from the Home Government, this Light was, in 1840, painted red and white, in stripes of five feet broad each, horizontally, in order that it may be seen more distinctly at a distance.

Partridge Island Light.—This light, at the entrance of the River and Harbour of Saint John, having been established upwards of forty years, requires no particular notice, further than that it is a fixed white light, and that the Light House is red and white, in vertical stripes.

Beacon Light.—Within Partridge Island, and upon a Spit or bar, which extends about half a mile S. S. E. off Sand Point, and which dries at two-thirds ebb, stands the Beacon Tower. Upon this Tower a light is established, which is eminently useful to the coasting trade of Saint John, and to all other vessels having pilots on board, as it enables them to enter the harbour at all hours of the night. A fixed white light. The House is white and black, in stripes vertically.

Cape Forchu Light.—The Light House on Cape Forchu, on the W. side of the entrance to Yarmouth, (Nova-Scotia,) in lat. 43, 39, N. long. 66 8, West, was put in operation on the 15th January, 1840, and exhibits a plain revolving light—visible one minute and a

quarter, and invisible half a minute. The building is painted white, and is elevated 135 feet above the level of the sea.

Quaco.—A revolving white light is placed on a small rock off Quaco Head, showing twice full and twice dark in a minute. This light can be seen from any quarter where a vessel can approach. The Light House is painted white and red in horizontal stripes.

Cape Enrage.—A new Light House, nearly opposite to Apple River Harbour. A plain white light. The House is painted white, and about 120 feet above tide mark.

The half of the expense of the Cape Sable and Brier Island Lights is paid by New Brunswick, as they are so highly useful to vessels trading with this Province.

West Quoddy Light.—This is an American Light, and is placed on the West side of the entrance into the Saint Croix by Lubec and Eastport; a new light house has lately been erected here, and the light much improved.

Light Houses in Nova Scotia—in addition to those previously noticed.

Sambro—Sambro Island, mouth of Halifax Harbour—a fixed Light.

Roseway—M'Nutt's Island, mouth of Shelbourne Harbour—two Lights, one above the other.

Liverpool—Coffin's Island, mouth of Liverpool Harbour—one revolving Light.

Canso—Island, Gut of Canso, two Lights, one above the other.

Halifax—Meagher's Beach, Halifax—one Light.

Pictou—Entrance to Pictou Harbour—one fixed Light, for eight months in the year.

Cross Island—Cross Island, near Lunenburg.

Low Point—Entrance to Sydney Harbour—one fixed Light.

ERRATA.

The reader is requested to make the following corrections and additions :—
To the list of "Counsellors and Attornies practising in the Province," add the undermentioned names :—

FREDERICTON.—Thomas W. Bliss, James Odell, Edward W. Miller, Junior, Bernard C. Friel, and John Henry Phair.

SAINT JOHN.—Robert Parker, Junior, John F. Jones, Samuel B. Davidson, Douglas B. Stevens, and Charles Watters.

DORCHESTER.—William Botsford Chandler, Junior, and Albert Smith.

SAINT STEPHENS.—James G. Stevens.

RICHMOND.—James A. James.

In the same list, for "Sackville" &c., read DORCHESTER.—M. B. Palmer, Esq., and insert after "Bathurst."—William End, Esquire, (Queen's Counsel.)

In the "Table of Roads and Distances," for the distances from "Fredericton to Quebec," substitute the following :

DISTANCES FROM FREDERICTON TO QUEBEC.

CITY OF SAINT JOHN.

RATES OF PILOTAGE,

Established by a Law or Ordinance of the Common Council of the City of Saint John—passed July, 1835.

Five Shillings per foot, for bringing any Ship or Vessel into the Harbour of Saint John, and mooring her into a safe place or berth, or securing her alongside of one of the Wharves; and Five Shillings per foot for removing and taking any Ship or Vessel out of the Harbour.

In cases where Pilots shall be detained on board of Vessels, under and by virtue of the Quarantine or Health Laws of the Province, they shall be entitled to demand and receive from Masters of such Vessels, the sum of Ten Shillings per day, for every day of such detention, in addition to the allowance aforesaid.

Coasting Vessels, going from one part of the Bay of Fundy to another, British or Foreign Steam Boats, or British Vessels drawing under six feet of water, are not compelled to take pilots; when employed, they are to be paid according to the rate above mentioned.

For removing Vessels from any mooring ground to any Wharf, or from one Wharf to another Wharf, and seeing them properly moored, or secured, the following rates: For Vessels not exceeding One Hundred Tons, Seven Shillings and Sixpence; for Vessels over One Hundred and not exceeding Two Hundred Tons, Ten Shillings; for Vessels over Two Hundred and not exceeding Three Hundred Tons, Fifteen Shillings; and for all Vessels over Three Hundred Tons, the sum of Twenty Shillings.

First Distance.—From Partridge Island to Musquash Cove Head, bearing North West, Five Shillings per foot.

Second Distance.—From Musquash Head to Point LePreaux, bearing North West, Six Shillings and Threepence per foot.

Third Distance.—From Point LePreaux to North Head of Grand Manan, bearing North West—or North Channel, bearing South East, Seven Shillings and Sixpence per foot.

Fourth Distance.—From the North Head of Grand Manan—or North Channel as aforesaid—to Machias Seal Island, bearing South, Eight Shillings and Ninepence per foot.

Fifth Distance.—Any where outside the aforesaid distance, Ten Shillings per foot.

HARBOUR MASTER'S FEES.

On Vessels of 30 Tons and under 50, 2s. 6d.; Vessels of 50 Tons and under 75, 3s. 9d.; 75 and under 100 tons, 5s.; 100 and under 150 tons, 6s. 3d.; 150 and under 200 tons, 7s. 6d.; 200 and under 300 tons, 10s.; 300 and under 400 tons, 12s. 6d.; 400 tons and upwards, 15s.; and all British Vessels under that tonnage and registered at Saint John, Fundy, or arriving from Ports to the Northward of Cape Cod, or the Westward of Cape Canso, or from any Port in Nova Scotia, to pay annually as follows: Under 30 tons, 3s. 9d.; over 30 and under 50 tons, 5s.; over 50 and under 75 tons, 6s.; over 75 and under 100 tons, 10s.

Merry words, merry words, ye come bursting around,
 Telling all that affection can say;
 'Tis the music of heart-chorus that dwells in the sound,
 "Many happy returns of the day."
 The red cheek of the child is more rich in its glow,
 And the bright eye more swift in its ray,
 When his mates hail his birth in their holiday mirth,
 And drink "happy returns of the day."
 The old man may smile while he listens, and feels
 He hath little time longer to stay;
 Still he liketh to hear from the lips that are dear,
 "Many happy returns of the day."

1846.]

FEBRUARY.

The trees are all leafless, and the hollow blast
 Sings a shrill anthem to the bitter gloom,
 The lately smiling pastures are a waste,
 While beauty generates in Nature's womb;
 The frowning clouds are charged with fleecy snow,
 And storm and tempest bear a rival sway;
 Soft gurgling rivulets have ceased to flow,
 And beauty's garlands wither in decay:
 Yet look but heavenward! beautiful and young
 In life and lustre see the stars of night
 Untouch'd by time through ages roll along,
 And clear as when at first they burst to light.
 And then look from the stars where heaven appears
 Clad in the fertile Spring of everlasting years!

MARCH.

1846.]

Why dost thou, silver-vested flower;
While tempests howl, and snow-storms lower,
Thus boldly brave rude Winter's power,
And rear thy head?

Why so impatient? Why not stay
Till zephyrs drive rude blasts away;
And day's bright orb, with cheering ray,
Warm thy cold bed?

Why stay not till the primrose pale,
With simple beauty spots the vale,
Till violets load the passing gale
With luscious balm?

APRIL.

Season of sighs perfumed, and maiden flowers,
 Young Beauty's birthday, cradled in delight
 And kept by muses in the blushing bowers
 Where snow-drops spring most delicately white!
 Oh it is luxury to minds that feel
 Now to prove truants to the giddy world,
 Calmly to watch the dewy tints that steal
 O'er opening roses—'till in smiles unfurled
 Their fresh-made petals silently unfold.
 Or mark the springing grass—or gaze upon
 Primeval morning till the hues of gold
 Blaze forth and centre in the glorious sun!

MAY.

[1846.]

'Tis May again, 'tis May again, the time of happy hours,
When Nature wears her fairest robes of young and dewy flow'rs,
When gentle morn wakes from the east as rosy as the sky,
And brooks are laughing in the meads, and birds are singing by,
Visions sweet as summer's eve, or summer's glorious day.
Are rushing on the mind of youth as lovely as they're gay,
Hopes prized more than coral lips, or maiden's blushing vow,
Are coming back to cheer old age, and deck its snowy brow.
Clouds calmly hung in silver light like folds of fleecy snow,
Are shadowed in the silent stream that by the valleys flow,
Now cradled by the swelling waves, now on the shore at play,
Now fitting round the lofty hills as blithesome as a fay.

We see the glory of thy steps
 Upon our hills once more;
 Oh, thou, the hope of every heart,
 The joy of every shore!
 Our skies have gained their deepest blue
 Our woods their vernal prime,
 For heaven and earth rejoice in thee,
 Thou glorious summer time!
 Thine are the long and cloudless days,
 The eves of golden light,
 Whose lingering glories meet the morn,
 And leave no room for night.

The air is heavy with the breath of flowers,
 And music floats around me like a dream;
 I see the smile of beauty in her bowers,
 And clustering lamps like stars above me gleam;
 I hear the voice of merriment sweep by,
 But wake no echoing gladness in my breast;
 I know that light and happy hearts are nigh,
 But feel mine own with heaviness oppress'd.
 'Tis ever thus!—the flowers we pluck must die;
 And those we love must perish, or forget!—
 To think of other hours is but to sigh—
 And memory but a title of regret!

At summer eve, when Heaven's ethereal bow
Spans with bright arch the glittering hills below,
Why to yon mountain turns the musing eye,
Whose sunbright summit mingles with the sky ?
Why do those cliffs of shadowy tint appear
More sweet than all the landscape smiling near;
'Tis distance lends enchantment to the view,
And robes the mountain in its azure hue.
Thus from afar, each dim-discovered scene
More pleasing seems than all the past hath been;
And every form that Fancy can repair
From dark oblivion, glows divinely there.

When autumn's mellow brown the wood o'erspreads,
And fades the smiling verdure of the meads;
When genial skies a milder influence shed,
And tinge with ruddy gleam the mountain's head;
When all the labouring world around is still;
Soft whispering gales alone the valley fill,—
Nature seems softly sinking to repose,
And the sweet calm in part on man bestows.
The jarring thoughts its lulling influence feel,
And o'er each sense delights unbidden steal—
Why ask the vain parade of worldly pride,
The toys which man's insensate race divide?

Farewell!—farewell! the glory;
Of the Summer's past away;
The year has told its story,
And yields to dull decay,
And faded leaves are flying.
Before each breath of air,
And Flora now is sighing
To see her bowers bare.
And Nature, though in mourning,
Smiles sweetly 'mid her gloom
And waits the Spring's returning,
When flowers again shall bloom.

NOVEMBER.

[1846.]

Long years have pass'd, old friend, since we
First met in life's young day;
And friends long lov'd by thee and me,
Since then have dropp'd away:
But enough remain to cheer us on,
And sweeten, when thus we're met,
The glass we fill to the many gone,
And the few who're left us yet.
Our locks, old friend, now thinly grow,
And some hang white and chill;
While some, like flow'rs 'mid autumn's snow,
Retain youth's colour still:

And so, in our hearts, though one by one,
 Youth's sunny hopes have set,
 Thank heaven, not all their light is gone,
 We've some to cheer us yet.
 Then here's to thee, old friend, and long
 May thou and I thus meet,
 To brighten still with wine and song
 This short life ere it fleet.
 And still as death comes stealing on,
 Let's never, old friend, forget,
 Ev'n while we sigh o'er blessings gone,
 How many are left us yet.

Rotten; Assistant Surgeon, F. Andrews. *At Saint Andrews.*—W. M. Pechell. *At Woodstock.*—Lieutenant H. C. Cagolet.

TIME FOR GOING THROUGH THE FALLS.

NEAR THE CITY OF SAINT JOHN.

The Falls are level or still water at about three and a half hours on the *flood*, and about two and a half on the *ebb*, so that they are passable four times in twenty four hours, about ten or fifteen minutes each time. No other rule can be given, as much depends on the floods in the River Saint John, and the time of high water or full sea, which is often hastened by high winds, and in proportion to the height of them.

A TABLE For Foretelling the Weather through all the Lunations of each year forever.

(FORMED BY DR. HERSCHELL, AND REVISED BY DR. ADAM CLARK.)

This table and the accompanying remarks are the result of many years' actual observation, the whole being constructed on a due consideration of the attraction of the sun and moon, in their several positions respecting the earth, and will by simple inspection show the observer what kind of weather will most probably follow the entrance of the moon into any of its quarters, and that so near the truth as to be seldom or never found to fail.

If the new moon, the first quarter, the full moon, or the last quarter happens	IN SUMMER.	IN WINTER.
Between midnight and 2 in the morning.	Fair.	Hard frost unless the wind is s. or w.
—2 and 4, morning.	Cold, and showery.	Snowy and stormy.
—4 and 6, “	Rain.	Rain.
—6 and 8, “	Wind and Rain.	Stormy.
—8 and 10, “	Changeable.	Cold rain, if the wind be w.; snow if e.
—10 and 12, “	Frequent showers.	Cold, and high wind.
At 12 noon, and 2 p.m.	Very rainy.	Snow or rain.
Between 2 and 4 p.m.	Changeable.	Fair and mild.
—4 and 6 evening.	Fair.	Fair.
—6 and 8, “	Fair, if wind n. w. Rainy, if s. or s. w.	Fair and frosty if wind is n. or n. e.
—8 and 10, “	Ditto.	Rain or snow, if s. or s. w.
—10 and midnight,	Fair.	Ditto. Fair and frosty.

Observations —1. The nearer the time of the moon's change, first quarter, full and last quarter, are to *midnight*, the fairer will the weather be during the seven days following.

2. The space for this calculation occupies from ten at night till two next morning.

3. The nearer to *midday* or *noon*, the phases of the moon happen, the more foul or wet weather may be expected during the next seven days.

4. The space for this calculation occupies from ten in the forenoon to two in the afternoon. These observations refer principally to the summer, though they affect spring and autumn nearly in the same ratio.

5. The moon's change, first quarter, full and last quarter, happening during six of the afternoon hours, i. e. from four to ten, may be followed by fair weather; but this is mostly dependent on the wind, as is noted in the table.

6. Though the weather, from a variety of irregular causes, is more uncertain in the latter part of autumn, the whole of winter, and the beginning of spring, yet, in the main, the above observations will apply to those periods also.

7. To prognosticate correctly, especially in those cases where the wind is concerned, the observer should be within sight of a good vane, where the four cardinal points of the heavens are correctly placed.

TABLE OF THE SOLAR SYSTEM.

NAMES.	Mean diam. in Eng. miles.	Mean distance from the Sun.	Time of rotation round their axes.	Time of revolving round the Sun.

POPULATION OF THE UNITED STATES IN 1840.

Maine, 501,793; New Hampshire, 284,574; Vermont, 291,948; Massachusetts, 737,699; Rhode Island, 108,830; Connecticut, 310,015; New York, 2,428,921; New Jersey, 373,306; Pennsylvania, 1,724,022; Delaware, 78,085; Maryland, 469,232; Virginia, 1,239,797; North Carolina, 753,110; South Carolina, 594,439; Georgia, 677,197; Alabama, 569,645; Mississippi, 375,651; Louisiana, 351,176; Tennessee, 829,210; Kentucky, 777,397; Ohio, 1,510,467; Indiana, 683,314; Illinois, 474,404; Missouri, 381,102; Michigan, 211,705; Arkansas, 95,642; District Columbia, 43,712; Florida, 54,207; Wisconsin Territory, 30,752; Iowa, 43,068 Total, 17,100,572.

In the United States are 584,547 whites who cannot read or write; 5,773 deaf and dumb; 5,024 blind; 14,508 insane or idiots; 2,487,213 slaves.

The population increases with great regularity 34 per cent. in ten years. At this rate the population will be, in round numbers, in 1850, 2,600,000; in 1860, 30,200,000; in 1900, 95,500,000.

The slave population the last ten years increased at about 25 per cent.; the free at 36 per cent., showing a regular increase of the free in proportion to the slave. The regular increase of the New England States is 14.3 per cent; Middle States, 25.6; Southern, 22.264; Western, 68.006.

POPULATION AND EXTENT OF THE GLOBE.

A short and easy method of
calculating Compound Inter-
est at Six per cent.

RULE.—Multiply the pr-
incipal sum, by the fol-
lowing numbers.

- For 2 years, by 1.1236
- For 3 years, by 1.191016
- For 4 years, by 1.268416
- For 5 years, by 1.358925
- For 6 years, by 1.418519
- For 7 years, by 1.503630
- For 8 years, by 1.598348
- For 9 years, by 1.699478
- For 10 years, by 1.790647
- For 11 years, by 1.886898

NOTE.—This will give
the amount of principal
and compound interest
for the given number of
years. Subtract the
principal from the amount
and it will show the com-
pound interest. Any sum
of money at compound
interest will double itself
in eleven years, ten
months and twenty two
days.

**Pleasure is the business
of the young. Business
is the pleasure of the old.
We give confidence.**

LIGHTNING.—The best thing to do when persons are struck with lightning is to dash cold water on them instantly, especially on the head. Blue clay wet is the best application for the sting of insects. A little wrong done to another is a great wrong done to ourselves. To render good for evil, is god-like; to render good for good, is man-like; to render evil for evil, is brute-like; to render evil for good, is devil-like. A life of full and constant employment is the only safe and happy one. Guard your tongue well in company.

SAINT JOHN N. B.

MISCELLANEOUS.

RECEIPTS FOR MAKING BALLS.—This method of administering medicines to horses and other animals is preferable in most cases to that of drenches. The following are a few of the balls most commonly used by the farmer :

Mild Physic Ball.—Barbadoes aloes, 6 drachms ; powdered ginger, 2 drachms ; castile soap, 2 drachms ; oil of cloves, 20 drops ; syrup of buckthorn sufficient to form a ball.

Strong Physic Ball.—Barbadoes aloes, 8 drachms ; ginger, powdered, 2 drachms ; castile soap, 2 drachms ; oil of cloves, 20 drops ; syrup of buckthorn sufficient to form a ball.

Colomel Ball for a Riding Horse.—Calomel, 1 drachm ; aloes, powdered, 6 drachms ; ginger, powdered, 2 drachms ; castile soap, 2 drachms ; oil of cloves, 20 drops ; syrup of buckthorn sufficient to make into a ball.

Colomel Ball for a Cart Horse.—Aloes, powdered, 8 drachms ; otherwise same as the last.

Diuretic Ball.—Castile soap 4 ounces ; nitre powdered, 2 ounces ; rosin, powdered, 2 ounces ; oil of juniper, half an ounce ; aniseed powder and treacle sufficient to make into eight balls.

Cordial Ball.—Cummin seed, powdered, 4 ounces ; aniseed, powdered, 4 ounces ; caraway seed, powdered, 4 ounces ; liquorice powder, 4 ounces ; ginger, powdered 2 ounces ; honey sufficient to make into balls the size of a hen's egg.

BEANS.—In some places bean meal is mixed with other meal in making coarse bread ; or the beans are boiled into a mess with fat meat, in which state they are very nutritious. Bean meal given to oxen soon makes them fat ; mixed with water and given as a drink to cows, it greatly increases their milk. A small quantity of beans is generally mixed with new wheat when ground to flour : the millers pretend that soft wheat will not grind well without beans, and they generally contrive that there shall be no deficiency in the necessary proportion. Thus a quantity of beans is converted into what is considered as wheaten flour.

The bean came originally from the East, and was cultivated in Egypt and Barbary in the earliest ages of which we have any records. It spread thence into Spain and Portugal, from whence some of the best varieties have been introduced into this country. The proportion of nutritive matter in beans, compared with other grain, is, according to Einhof, as follows :—

	By weight.	Or in a bushel.
Wheat	- 74 per cent.	- about 47 lbs
Rye	- 70 —	- — 39
Barley	- 65 —	- — 33
Oats	- 58 —	- — 23
Beans	- 68 —	- — 45
Peas	- 75 —	- — 49
French bean	84 —	- — 54

Beans are best given broken, especially to aged live live stock.

Futurity is concealed from us to humble our pride.

Bots.—These are a kind of worms very troublesome to horses. Bots are the larvæ or maggots of a species of gad-fly (the *Ustrus equi*), which deposits its eggs on the legs, mane, or those parts of the horse that the animal is most apt to lick. The egg is immediately hatched by the warmth and moisture of the tongue, and the little worm conveyed into the mouth, whence it crawls down the œsophagus into the stomach. It adheres, to the cuticular coat of the stomach by means of little hooks, with which its mouth is furnished; and there it remains from the summer of one year to the spring of the next, nourished by the mucus of the stomach, or the food which it contains. Then having attained its full size as a maggot, it loosens its hold, and is carried along the intestines with the other contents of the stomach, and evacuated with the fæcus. Before it drops, it generally clings for a while to the verge of the anus, and tickles and teases the horse to a very great degree. Except they exist in most unusual numbers, bots do neither good nor harm during their residence in the stomach of the horse. It is the habitation which nature has assigned to them; and the safety of so noble an animal as the horse would not have been compromised for the sake of a maggot and a fly. The best advice that can be given therefore is to let them alone, or at most to be content with picking them off when they appear under the tail. There are two good reasons for this. The first is, that there is not any medicine that will expel them; the strongest and most dangerous purgative is insufficient. The second reason is, that if the bots are let alone they will, in due time come all away without our help or meddling. Green food however expels them readily, as does common salt in the proportion of two to four ounces to a quart of water. The most simple and efficient remedy is a quart of milk, mixed well with a quarter of a pound of honey or brown sugar, given fasting. This is much better than aloes. The following are stated to be the symptoms shewn by the horse when he is much infested by these insects. He loses flesh, coughs, eats sparingly, and bites his sides; at length he has a discharge from his nose; and these symptoms are followed by a stiffness of his legs and neck, staggering, difficulty in breathing, convulsions, and death. The preventive means are very simple, consisting only in scraping off the eggs or nits of the fly every day.

FARM ACCOUNTS.—Let any farmer make the experiment of keeping accounts and he will find it both interesting and useful to know from year to year the actual products of his farm. Let every thing therefore which can be weighed and measured be so tested; and let that which cannot be brought to an exact standard be estimated as if he himself were about to sell or to purchase it. Let him likewise, as near as possible, measure the ground which he plants, the quantity of seed which he uses, and the manure which he applies. The labour of doing this is nothing compared with the satisfaction of having done it, and the benefits which must arrive from it. Conjecture, in these cases, is perfectly wild and uncertain, varying often, with different individuals, almost 100 per cent. Exactness enables a man to form conclusions which may most es-

esome to horses.

sentially, and in innumerable ways avail to his advantage. It is that alone which can give any value to his experience; it is that which will make his experience the sure basis of improvement; it will put it in his power to give safe counsel to his friends; and it is the only ground on which he can securely place confidence in himself.

SALT AS A MANURE.—We know that plants require for their sustenance and growth a certain supply of each of the constituents of common salt, which supply in general they must obtain from the soil. If the soil in any field contain naturally a sufficient quantity of common salt, chlorine and soda in any other state of combination, it will be unnecessary to add this substance; or, if added, it will produce no beneficial effect. If on the other hand the soil contain little, and has no natural source of supply, the addition of salt may cause a considerable increase in the crop.

Now there are certain localities in which we can say beforehand that common salt is likely to be abundant in the soil. Such are the lands that lie along the sea coasts, or which are exposed to the action of prevailing winds. Over such districts the spray of the sea is constantly borne by the winds high in the air, from which it descends afterward in the rains. The application of common salt is most likely to be beneficial in districts which are remote from the sea, or are sheltered from the prevailing sea winds. This consideration, it may be hoped, will induce many practical men to proceed with more confidence in making trial of its effects on inland situations.

Some plants are more likely to be benefitted by the application of common salt than others. Observations are still wanting to show which of our cultivated crops is most favored by it. Some crops may delight more in salt than others; and if we consider how much *alkaline*, fixed salt, matter is contained in the top and bulbs of the potato and turnip, we are almost justified in concluding that generally salt will benefit green crops more than crops of grain, and that it will promote more the development of the leaf and stem than the filling of the ear.

If this be so, we can readily understand how a soil may already contain abundance of salt to supply the wants of one crop, and yet too little to meet the demands of another.

TO SAVE OATS IN FEEDING HORSES.—Bruise or crush your oats in a nut mill, or otherwise, as convenient, and the horse will become fatter on half the usual allowance, than on double the quantity unprepared. If you cannot bruise the oats, pour hot water on them, and let them soak for a few hours.

TO FIND THE WEIGHT OF CATTLE.—Take the girth behind the shoulder, and the length from the fore part of the shoulder-blade to the buttock, both in feet. Multiply the square of the girth by 4 times the length, and divide by 21; the quotient is the weight, nearly of the four quarters, in stones of 16 lb., each lb. 17½ ounces avoirdupois.

Never keep your cattle short:—few farmers can afford it. If you starve them they will starve you.

CUTTING OF GRAIN.—It is the opinion of experienced husbandmen, that wheat should be cut down some days before it is fully or dead ripe. The grain hardens well in the sheaf; the sample is better; and there is nothing lost in measure by this mode of management. The harvest thus begins earlier, and its labors are more easily distributed. Barley ought likewise to be cut down before it is ripe; otherwise the straw becomes brittle, and much loss is occasioned by the heads breaking off. Though oats are reckoned a hardy grain, yet the more early varieties, being liable to damage by high winds, or by exposure to much heat, ought to be cut as soon as they are nearly ripe, in order to lessen the risks to which they are exposed. An experienced Farmer states, that all sorts of grain ought to be cut when ever the straw, immediately below the ear, is so dry, that on twisting it, no juice can be expressed; for then the grain cannot improve, as the circulation of the juice to the ear is stopped. It matters not, that the stock below is green. Every hour that the grain stands uncut, after passing this stage, is attended with loss.

DIETETIC MAXIMS.—In summer, the food should consist principally of vegetables; in winter, a larger amount of animal matter may be taken, especially by the laborer. Boiling renders food more digestible, but it deprives it of a considerable portion of its nutritive principle. Animal food should not be over-boiled—vegetables should be boiled until perfectly tender. Roasting dissipates less of the nutritive parts of the meat. Roasted meat is, therefore, more nourishing than boiled, but much more stimulating. Bread constitutes a wholesome addition to all our meals. It should be perfectly raised, fully baked, and one day old. Salt, and, on occasions, a very moderate quantity of pepper, are safe and grateful additions to our food. Beyond this, however, all seasoning becomes injurious.

TEA.—In 1663, the East India Company "imported 100 pounds weight of good *tey*." In 1669, 143½ pounds and in 1678,—4,713 pounds; but this proved a glut in the market. Great Britain now imports annually about 23,000,000 pounds of tea; and the United States, from 12 to 15 million pounds.

POWER OF STEAM.—One pound of cotton, (says Mr. Gordon, in his lectures at the London Literary and Scientific Institution,) which formerly could only be spun into a thread of one hundred and eighty yards long, can now, by the application of steam, produce a thread of *one hundred and sixty-seven miles in length*.

CORK.—Corks are formed from the dead bark of the cork tree, which is taken off at certain seasons of the year, being separated without difficulty from the portions of more recent growth. The vigor of a tree is said to be improved by being barked once every eight or ten years after it is fifteen years old; some, which have been regularly submitted to this operation, living for 150 years.

THE REVERSE OF A DRY JOKE.—A hardy seaman who had escaped one of the recent shipwrecks on our coast, was asked by a good lady how he felt when the waves dashed over him; he replied—"Wet, madam, very wet."

WORDS, WORDS.—Demaratus, king of Sparta, being asked whether he was silent through folly or wisdom, replied, "A fool cannot be silent."

"HATHEWAY COOKING STOVES."

They have been found to effect a saving of ONE HALF
THE FUEL, and cook better than any Stove in use.

THOMAS C. EVERITT.

St. John, Sept. 1845.

By submitting Certificates for the perusal of the public, the subscriber is actuated by selfish motives in recommending articles of his own make ; but at the same time he thinks it a duty he owes to the public to place them on their guard against purchasing a quantity of *trash*, which is now thrown into this market from the *United States*,—consisting of old worn-out stoves and a variety of such as cannot be sold in that country, being of old fashioned and unsaleable sorts, and too light in most cases to be durable. On this subject he hopes they will judge cautiously. It is after having tried a number of different Cooking Stoves in his own house and the use of "HATHEWAY'S" for the last three years, that he has been induced to go largely into the manufacture of that Pattern, of which he now has Three Sizes at £6, £7, and £8, each.

VERITT.

Saint John, N. B., September, 1845.

MR. THOMAS C. EVERITT :—Sir, In reply to your inquiries respecting the qualities of your "Hatheway Cooking Stoves," I have to remark that I have found that which I purchased of you about three years ago to be the best Cooking Stove with which I have been acquainted. It has done all the cooking for my Boarding House at which I frequently dine Thirty persons per day. It has given the utmost satisfaction, and has never been out of repair. In fact if I could not procure another like it, I would not part with it now for double its original cost.

JOSEPH READ.

I have read what Mr. Read has stated relative to "Hatheway's Cooking Stove," and do fully concur in what he has said, having had one of them to do the cooking in my Hotel for about three years past. My fireplace has been closed up, and the cooking is all done with the Stove in question. I do therefore freely recommend it to the public.

Saint John, N. B.

JOHN B. LONGLEY.

I purchased of Mr. Thomas C. Everitt, one of his "Hatheway" Cooking Stoves about Sixteen Months ago, and do not hesitate to recommend it as the best description of Cooking Stove to be had. I find from a strict investigation that it does not consume one half the quantity of wood that I formerly burnt in a Cooking Stove. It boils, broils, and bakes well, and I would not part with it for double its cost if I could not get another of the same pattern.

M. NUGENT.

Saint John, N. B.

I purchased of Mr. T. C. Everitt, one of his "Hatheway Cooking Stoves," about Eighteen months ago, after having examined various other kinds. There has been no other means of cooking in my house since the Stove was purchased. And I confidently recommend it as the best description of Cooking Stove within my knowledge. It accomplishes every object in cooking and washing desired by my family, and gives the most complete satisfaction: it has never yet been out of order.

C. C. MACDONALD,

Saint John, N. B.

No. 5, King Street

We have read over the foregoing Certificates relative to the properties of "HATHEWAY'S" COOKING STOVES, and having purchased of Mr. EVERITT and had in use of the same pattern, we do most freely recommend them to the public as the most perfect and economical Cooking Stoves that have come within our knowledge.

INSURANCE & ASSURANCE.

FIRE INSURANCE.

THE ÆTNA INSURANCE COMPANY, AND THE PROTECTION INSURANCE COMPANY, OF HARTFORD, CONNECTICUT.

THE undersigned Agent for the above Companies, continues to effect Insurance on Buildings finished or unfinished, Stores, Merchandize, Mills, Ships while in port or on the stocks, and on every other species of Insurable personal property against **LOSS OR DAMAGE BY FIRE**, at as low rates of premium as any similar institution of equal good standing.

The course pursued by these Companies, in transacting their business, and in the adjusting and payment of Losses, is liberal and prompt.

By order of the respective Boards of Directors, the undersigned Agent is authorized, in all cases of disputed claims, under Policies issued by him, on which suits may be instituted, to accept service of process, and enter appearance for his principals, in the Court of this Province, and abide the decision thereon.

Terms made known, and if accepted, Policies issued to applicants without delay.

LIFE ASSURANCE.

THE UNITED KINGDOM LIFE ASSURANCE COMPANY, OF LONDON, and NATIONAL LOAN FUND LIFE ASSURANCE SOCIETY, OF LONDON,

Continue to effect Assurance, upon highly favourable terms.

Blanks furnished gratis, and every information given as respects either department, by application at the Insurance Agency, Dunn's Fireproof Building, Prince William Street, Saint John.

ALEX. BALLOCH, Agent.

"ÆTNA INSURANCE COMPANY."

Saint John, New-Brunswick, November 22d, 1842.

WE, the undersigned, having suffered Loss by Fire, under Policies issued by ALEXANDER BALLOCH, as Agent for the "*Ætna*" Insurance Company, of Hartford, do hereby certify that we have found no difficulty, either on the part of the Agent to adjust the Loss, or on the part of the company, in the payment thereof; and therefore now give it as our opinion, that all that is required from the Assured is to show an equitable Loss and Claim, in order to meet immediate adjustment, and payment in conformity with the conditions of the policy—and evidence to this effect we consider the Company is bound to exact *indiscriminately*, from each and every person suffering Loss, in order to protect all *honest* parties doing Insurance with them.

In testimony of the good opinion that we entertain of the liberality, justice, and stability of the aforesaid Company:—We do hereby certify that we continue to effect Insurance at their Agency in this city.

THE EARL OF ALDBOROUGH

CURED BY

Holloway's Pills.

The Earl of Aldborough cured of a Liver and Stomach Complaint.

Extract of a Letter from the Earl of Aldborough, dated Villa Messina, Leghorn, 21st February, 1845.

To Professor HOLLOWAY.

SIR,—Various circumstances prevented the possibility of my thanking you before this time for your politeness in sending me your Pills as you did. I now take this opportunity of sending you an order for the amount, and, at the same time, to add that your Pills have effected a cure of a disorder in my Liver and Stomach, which all the most eminent of the Faculty at home, and all over the Continent, had not been able to effect; nay! not even the waters of Carlsbad and Marienbad. I wish to have another Box and a Pot of the Ointment, in case any of my family should ever require either.

Your most obliged and obedient servant,

Signed, ALDBOROUGH.

A Wonderful Cure of Dropsy of Five Years' standing.

Copy of a Letter from Mr. Thomas Taylor, Chemist, Stockton, Durham, 17th April, 1845.

To Professor HOLLOWAY.

SIR,—I think it my duty to inform you that Mrs. Clough, wife of Mr. John Clough, a respectable farmer of Acklam, within four miles of this place, had been suffering from Dropsy for five years, and had had the best medical advice without receiving any relief. Hearing of your Pills and Ointment, she used them with such surprising benefit that, in fact, she has now given them up, being so well and quite able to attend to her household duties as formerly, *which she never expected to do again.* I had almost forgotten to state that she was given up by the Faculty *as incurable.* When she used to get up in the morning it was impossible to discover a feature in her face, being in such a fearful state. This cure is entirely by the use of your medicines.

I am, Sir, yours, &c. &c.

Signed, THOMAS TAYLOR.

A Cure of Indigestion and Constipation of the Bowels.

Copy of a Letter from G. R. Wythen Baxter, Esq., Author of the "Book of the Bastiles," &c. &c.

The Brynn, near Newtown, Montgomeryshire, North Wales, March 3d, 1845.

To Professor HOLLOWAY.

SIR,—I consider it my duty to inform you that your Pills, a few boxes of which I purchased at Mr. Moore's, Druggist of

Newtown, have cured me of constant indigestion and constipation of the bowels, which application to literary pursuits had long entailed upon me. I should strongly recommend Authors, and studiously-disposed persons generally, to use your valuable Pills. You have my permission to publish this note, if you wish to do so.

I am Sir, your most obedient servant,
Signed, G. R. WYTHEN BAXTER.

A Cure of Asthma and Shortness of Breath.

Extract of a Letter for the Rev. David Williams, Resident Wesleyan Minister at Beaumaris, Island of Anglesea, North Wales, January 14th, 1845.

TO PROFESSOR HOLLOWAY.

SIR,—The Pills which I requested you to send me were for a poor man of the name of Hugh Davis, who, before he took them, *was almost unable to walk for the want of breath!* and had only taken them a few days when he appeared *quite another man*; his breath is now *easy and natural*, and he is increasing daily in strength.

Signed, DAVID WILLIAMS.

N. B.—These extraordinary Pills will cure any case of Asthma or shortness of breath, however long standing or distressing the case may be, even if the Patient be unable to lie down in bed through fear of being choked with cough and phlegm.

This Wonderful Medicine can be recommended with the greatest confidence for any of the following Diseases:—

Ague	Dropsy	Jaundice	Secondary Symp-
Asthma	Dysentery	Liver complaints	toms
Billious complaints	Erysipelas	Lumbago	Tic-Douloureux
Blotches on the Skin	Female Irregularities	Piles,	Tumours
Bowel Complaints	Fevers of all kinds	Rheumatism	Ulcers
Colics	Fits	Retention of urine	Veneral Affec-
Constipation of bowels	Gout	Sore Throats	tions
Consumption	Head-ache	Scrofula or King's Evil	Worms of all kinds
Debility	Indigestion	Stone and Gravel	Weakness from whatever cause, &c. &c.
	Inflammation		

These truly invaluable Pills can be obtained at the establishment of Professor HOLLOWAY, near Temple Bar, London, and of Peters & Tilley, *Agents*, No. 2, King Street, St. John, N. B.; James F. Gale, Fredericton; W. T. Baird, Woodstock; Alex. Lockhart, Quaco; James Beck, Bend Petitcodiac; O. R. Sayre, Dorchester; John Bell, Shediac; John Lewis, Hillsborough; Isaac Turner, Hopewell; Geo. W. Hoben, and John Currey, Canning; Samuel Foster, Kingston; R. S. McDonald, Grand Lake; Hugh McMonagle, Sussex Vale; James E. White, Belisle—in boxes at the following prices: 1s. 9d., 4s. 6d., and 7s. each. There is considerable saving by taking the larger sizes.

ALL MAY BE CURED

BY

HOLLOWAY'S OINTMENT.

FIFTY ULCERS CURED IN SIX WEEKS.

*Extract of a Letter from John Martin, Esq., "Chronicle" Office,
Tobago, West Indies:—*

February 4th, 1845.

TO PROFESSOR HOLLOWAY.

SIR,—I beg to inform you that the inhabitants of this Island especially those who cannot afford to employ medical gentlemen, are very anxious of having your astonishing Medicines within their reach, from the immense benefits some of them have derived from their use, as they have been found here, in several cases, to cure Sores and ulcers of the most malignant and desperate kind. One gentleman in this Island, who had, I believe, about fifty running ulcers about his legs, arms, and body, who had tried all other Medicines before the arrival of yours, but all of which did him no good; but yours cured him in about six weeks, and he is now, by their means alone, quite restored to health and vigour.

Signed, **JOHN MARTIN.**

PILES, FISTULAS, AND BEARINGS-DOWN.

A Remarkable Cure by these Pills and Ointment.—A half-pay lieutenant, lately residing at St. Helier's, Jersey, whose name by request is omitted, had for three years suffered from piles and fistula, besides a general bearing down, of the most distressing nature. He had twice undergone an operation, but to no purpose, and at last gave himself up to despair. Yet notwithstanding this complication of complaints, together with a debilitated constitution, he was completely cured of all his infirmities, and restored to the full enjoyment of health by these justly renowned medicines, when every other means had failed.

Extraordinary Cure in the West Indies, of Leprosy and other direful Skin Diseases.

June 3d, 1844.

MR. LEWIS REEDON, of Georgetown, Demerara, writes under the above date—that Holloway's Pills and Ointment have cured bad legs that no doctor could manage, ulcers and sores that were of the most dreadful description, as likewise leprosy, blotches, scales and other skin diseases of the most frightful nature, and that the cures effected there by these wonderful medicines, are so numerous and extraordinary as to astonish the whole population.

Cancered Breast—A Wonderful Circumstance.

Copy of a Letter from Richard Bull, Bootmaker, Tatton, near Southampton.

"February 9th, 1845.

"TO PROFESSOR HOLLOWAY.

"SIR,—The Lord has permitted to be wrought a wonderful cure of Cancers or Abscesses, of twelve years' standing, in my wife's breast. In the latter time, eleven wounds were open at once. The Faculty declared the case as past cure, several pieces of bone

had come away, and I expected that my poor wife would soon have been taken from me. It was then that a friend recommended the use of your Pills and Ointment, which, to our utter astonishment, in the space of about three months, healed up the breast as soundly as ever it was in her life.

"I shall ever remain

"Your most grateful and obedient servant,

Signed, "RICHARD BULL."

Wheezing on the Chest and Shortness of Breath.

Copy of a Letter from Mr. Jeremiah Casey, No. 1, Compton-Place, Compton-street, Brunswick Square, London, April 25th, 1845.

TO PROFESSOR HOLLOWAY.

SIR,—I beg to inform you that I believe I had been, for more than three years, one of the greatest sufferers in the world with Chronic Asthma. For weeks together my breath was frequently so short that I was afraid every moment of being choked with phlegm. I never went into a bed; very often indeed have I been obliged to pass the night without being able to recline sufficiently to lay my head on a table, lest I should be suffocated. No one thought I should live over the winter, nor did I expect it myself; but I am happy to say that I am now able to work from morning to night, and that I sleep as well as ever I did in my life: and this miracle (I may say) was effected by rubbing your invaluable Ointment twice a day into my chest, and taking ten of your Pills at bedtime, and ten again in the morning, for about three months.

Signed, JEREMIAH CASEY.

In all Diseases of the Skin, Bad Legs, Old Wounds and Ulcers, Bad Breasts, Sore Nipples, Stoney and Ulcerated Cancers, Tumours, Swellings, Gout, Rheumatism, and Lumbago, likewise in cases of Piles; Holloway's Pills, in all the above cases, ought to be used with the Ointment; as by this means cures will be effected with a much greater certainty, and in half the time that it would require by using the Ointment alone. The Ointment is proved to be a certain remedy for the bite of Moschettoes, Sand-flies, Chiego-foot, Yaws, and Coco-bay, and all skin Diseases common to the East and West Indies, and other tropical climes.

Burns, Scalds, Chilblains, Chapped Hands and Lips, also Bunions and Soft Corns, will be immediately cured by the use of the Ointment.

Sold by the Proprietor, 244, Strand (near Temple Bar,) London, and by Peters & Tilley, Agents, No. 2, King Street, St. John, N. B.; James F. Gale, Fredericton; W. T. Baird, Woodstock; Alex. Lockhart, Quaco; James Beck, Bend Petitcodiac; O. R. Sayer, Dorchester; John Bell, Shediac; John Lewis, Hillsborough; Isaac Turner, Hopewell; Geo. W. Hobben, and John Currey, Canning; Samuel Foster, Kingston; R. S. McDonald, Grand Lake; Hugh McMonagle, Sussex Vale; James E. White, Bellisle—in pots and boxes at the following prices: 1s. 9d., 4s. 6d., and 7s. each. There is considerable saving by taking the larger sizes.

N. B.—Directions for the guidance of Patients in every Disorder are affixed to each Box.

JOHN G. SHARP,
CHEMIST, DRUGGIST, AND APOTHECARY,

Corner of North Market Wharf & Dock Street,
**MANUFACTURER OF SODA, POTASS, and MAG-
NESIA WATERS.**

Keeps on a hand a good assortment of **PATENT MEDI-
CINES, DRUGS, PERFUMERY, DYE WOODS,**
INDIGO, ARMATTO, BLUE VITRIOL, COPPERAS,
ALUM, EPSOM SALTS, CREAM OF TARTAR,
SULPHUR, &c. &c. &c.

Patent and Common Single and Double TRUSSES.

The following valuable **MEDICINES** are prepared at the
above Establishment :

**SHARP'S ALKALINE INFUSION OF
SARSAPARILLA.**

SARSAPARILLA has of late years been much used and
with great success in cases of Chronic Rheumatism, as an
altrative in Scrofulous Affections, Scurvy, Obstinate Cutane-
ous Eruptions, Indolent Ulcers, Diseases of the Periostum and
Bone, attended with obscure pains, wasting of the flesh, ten-
derness of the part, tumours and nodes unconnected with Syphilis,
and in that state of the habit known among medical men under
the term Cachexia, but which is not easy to define; in such
cases Sarsaparilla proves a most valuable remedy, and often ef-
fects a cure when all other remedies have been long administered
in vain, and when the diseased state of the system has been of
many years duration.

It is also considered by the most eminent Surgeons of the pre-
sent day to be the best medicine for re-establishing the constitu-
tion after it has undergone the effects of mercury.

The infusion contains all the properties of the Sarsaparilla, in
a highly concentrated state, together with the addition of an alkali,
which is strongly recommended by the late Mr. Abernethy;
also by Professor Brande, who in a late edition of his valuable
work on Pharmacy, says "the addition of an alkali in the pre-
paration of Sarsaparilla, seems greatly to facilitate the extraction
of the soluble matter, and may be used with great advantage.

Amongst the advocates for this Medicine, may be mentioned
the names of Sir C. Brodie, Bart., Sir James Clark, the late Sir
A. Cooper, Bart., Drs. J. A. Paris, M. Ryan, Grahame, Marshall
Hall, M. D. F. R. S., &c. &c.  Sold in bottles at 3s. 9d.
and 5s. each.

SHARP'S APERIENT FAMILY PILLS.

These Pills have been extensively used during the last Four
Years, and have proved invaluable as a **FAMILY MEDICINE.**

Y PILLS.
ing the last Four
LY MEDICINE.

They contain neither Calomel, Antimony, or any Medicine re-
quiring confinement or alteration of diet, and may be taken by
persons of all ages without the slightest injury to the constitution.
They are an invaluable remedy for all Disorders arising from a
confined state of the Bowels—such as pains in the Stomach,
Headache, Dimness of Sight, &c. &c. Their operation is very
gentle, and they never gripe.

SHARP'S Balsam of HOARHOUND & ANISEED.

For Coughs, Colds, Shortness of Breath, Asthma, &c.

This excellent Medicine has the extraordinary property of
immediately relieving Coughs, Colds, Hoarseness, Difficulty of
Breathing, and Huskiness of the Throat. It operates by dissolv-
ing the congealed phlegm, and causing free expectoration.

Persons who are troubled with that unpleasant tickling in the
Throat, which deprives them of rest night after night by the in-
cessant cough which it provokes, will by taking one dose find
immediate relief; and one bottle in most cases will effect a cure.
Sold in Bottles, at 1s. 6d. and 2s. 6d. each.

SHARP'S KALYDOR.

By applying the KALYDOR copiously, several times a day,
and letting it remain on, it will radically cure all Eruptions,
Tetters, Ring Worms, Inflamed Eyes, Burns, Scalds, &c. &c.

Ladies Suckling will find it an excellent remedy for allaying
inflammation—cooling and refreshing the infant's mouth. It
being perfectly innocent, the most delicate lady or child may
use it with perfect safety.

It is invaluable as a renovating and refreshing wash during
travelling, or exposure to the sun or harsh winds.

Gentlemen after shaving, by applying the Kalydor and letting
it remain on the face, will find it allay the irritation and smart-
ing pain, and render the skin soft and pleasant.

SHARP'S COCOA NUT OIL FOR THE HAIR.

This is one of the best Articles ever offered to the public for
Cleaning, Strengthening, and promoting the Growth of the
Hair.

SHARP'S TOOTH POWDER.

It is superior and more agreeable in use than any other
DENTRIFICE for beautifying the Teeth and Gums. It re-
moves Tartar without injuring the enamel of the Teeth—giving
them a beautiful pearly appearance.

SHARP'S Powder for Destroying RATS and MICE.

Farmers and others, whose premises are infested with Rats and Mice,
will find it to their advantage to try this Powder,—being composed of ingre-
dients which possess the peculiar property of attracting these animals. It
proves a speedy and certain means of destroying them. Put up and sold in
packages at 1s. 6d.
